

**computers et cetera** ● ● ● **MEAD Technology** ▶ at a Glance

▶ **CEC IT Hub created to extend service and business solutions Australia wide:**

If you have been employed by a larger corporate organisation that has sophisticated IT infrastructures and in-house technical personnel, you may have accessed your organisation's private network with the ability to share information between colleagues from home or remote locations.

▶ **As a small or medium sized organisation you have the same IT benefits as any of the fortune 500 Companies:**

**MEAD Systems** gives you access to the same state of the art IT infrastructure, **but without** any of the associated costs including staffing, building or maintaining specialized server management functions, on-going maintenance, security, disaster recovery, and application performance.

▶ **Save between 25 - 40% on IT costs:**

By eliminating capital expenditure and associated infrastructure costs your savings can be re-invested in your organisation's growth. Our service is provided at a **PAYG MONTHLY FIXED COST** allowing you to budget and focus on your core activities rather than depending on your internal IT infrastructure and systems.

▶ **Your Data is secure at our World Class AAA Security Data Centre:**

This facility enables us to host your applications and critical data on advanced terminal servers, which include redundancy, unlimited power backup, stringent physical and network security measures and firewall protection. All your vital data is continually backed up and stored off-site daily.

▶ **Access to professional expertise:**

CEC employs their own system engineers and technicians, giving you access to professional expertise and providing your business with the latest software updates and access to emerging technologies.

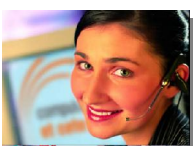

▶ **Instantly access your office anytime, no matter where you are:**

Working away from the office at home or perhaps a coffee shop, you simply turn on your computer or laptop and all your business information is instantly available. **MEAD Systems** allows you to access your own virtual private network with a secure encrypted communication link sharing the same folders and calendars with colleagues, knowing your confidential data is always securely protected.
